

MPOT POTENTIOMETER MODULE

5K-Ohm/270 degree

270° potentiometer  
5 kΩ

The 10-turn potentiometer has a decimal scale and locking lever  
The potentiometer modules are fitted with standard values. They are available as 270° potentiometer and as 10-turn potentiometer with fine adjustment. They can be operated with 10 V DC or 24 V DC. A resistor reduces the voltage so that a 24 V DC voltage can be reduced to operate between approx. 0...11 V. The connection is via terminals.
