

## **MPOT POTENTIOMETER MODULE**

10K-Ohm/270 degree with relay

270° potentiometer with relay contact 10 kΩ

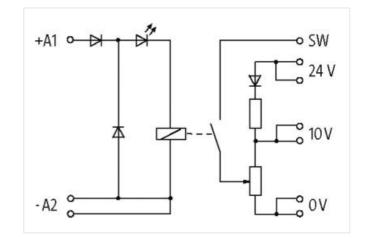

The 10-turn potentiometer has a decimal scale and locking lever The potentiometer modules are fitted with standard values. They are available as 270° potentiometer and as 10-turn potentiometer with fine adjustment. They can be operated with 10 V DC or 24 V DC. A resistor reduces the voltage so that a 24 V DC voltage can be reduced to operate between approx. 0...11 V. The connection is via terminals. A set-point

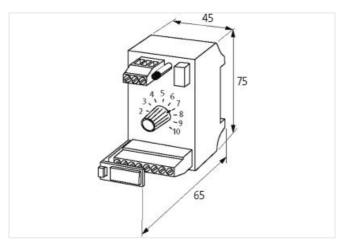

can also be switched-on using an integrated relay and separate output. Several elements can be daisy-chained.
